***Allowable Subject Matter***

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process as called for in claim 1 in which vinyl aromatic compound is produced and purified by a step of alkylation of aromatic with olefin, steps of separation to produce streams containing different alkylaromatic compounds for transalkylation, dehydrogenation and then the product of dehydrogenation step and the polyalkylated aromatic hydrocarbon distillate stream from the alkylation effluent is together fed to a distillation column to discharge an overhead consisting of vinyl aromatic monomer having a purity higher than 99.7% wt. One having ordinary skill in the art who studies the specification would recognize that applicants of this application are the first who know how to use a source available in the process, namely the heavy polyalkylated aromatic product of the alkylation step, for purifying the desired vinyl aromatic product with a high purity (see the paragraph bridging pages 4 and 5 of the specification; also see examples). The closest art of record - Ward (3,408,265) - discloses a process of recovery of styrene from ethylbenzene in a distillation column. However, Ward does not disclose feeding a polyalkylated aromatic compounds into the distillation column with the styrene so that a highly pure styrene can be recovered as the overhead (see the entire patent for details).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
